

Declaration on PFAS and TSCA Compliance

HAFNER Pneumatika Kft. hereby declares that certain components of the products we manufacture and distribute – typically sealing rings – may contain fluorinated polymers, such as Viton® (FPM/FKM) and Teflon® (PTFE).

Viton® and Teflon® are **fluorinated elastomers** which, under the broad definition, are classified within the **PFAS (per- and polyfluoroalkyl substances)** group.

In this context, we state the following:

- The fluorinated polymers used are **listed in the United States TSCA (Toxic Substances Control Act) Inventory**, and are not subject to current restrictions or prohibitions.
- We **do not use any PFAS substances** in our manufacturing processes that are banned or subject to **reporting requirements** under applicable **EPA PFAS regulations**, particularly **TSCA Section 8(a)(7) (2023)**.
- Our products **do not contain other PFAS substances classified as Substances of Very High Concern**.
- Our products are **compliant with the current EU REACH and US TSCA regulations** regarding PFAS content.

Should the relevant regulations change, we will update our product compositions and documentation accordingly to ensure continued compliance.
